

# Contents

<b>1</b>	<b>What are finite elements?</b> .....	<b>1</b>
1.1	Introduction .....	1
1.2	Key points of the FE method .....	1
1.3	Potential energy .....	6
1.4	Projection .....	8
1.5	The error of an FE solution .....	13
1.6	A beautiful idea that does not work .....	15
1.7	Set theory .....	16
1.8	Principle of virtual displacements .....	23
1.9	Taut rope .....	29
1.10	Least squares .....	33
1.11	Distance inside = distance outside .....	37
1.12	Scalar product and weak solution .....	40
1.13	Equivalent nodal forces .....	42
1.14	Concentrated forces .....	44
1.15	Green's functions .....	51
1.16	Practical consequences .....	55
1.17	Why finite element results are wrong .....	57
1.18	Proof .....	64
1.19	Influence functions .....	69
1.20	Accuracy .....	80
1.21	Why resultant stresses are more accurate .....	84
1.22	Why stresses at midpoints are more accurate .....	89
1.23	Why stresses jump .....	98
1.24	Why finite element support reactions are relatively accurate ..	99
1.25	Gauss points .....	104
1.26	The Dirac energy .....	110
1.27	How to predict changes .....	113
1.28	The influence of a single element .....	126
1.29	Retrofitting structures .....	130
1.30	Local errors and pollution .....	136
1.31	Adaptive methods .....	147
1.32	St. Venant's principle .....	172
1.33	Singularities .....	175
1.34	Actio = reactio? .....	177

1.35	The output	181
1.36	Support conditions	183
1.37	Equilibrium	184
1.38	Temperature changes and displacement of supports	187
1.39	Stability problems	193
1.40	Interpolation	197
1.41	Polynomials	199
1.42	Infinite energy	208
1.43	Conforming and nonconforming shape functions	209
1.44	Partition of unity	211
1.45	Generalized finite element methods	213
1.46	Elements	220
1.47	Stiffness matrices	221
1.48	Coupling degrees of freedom	224
1.49	Numerical details	226
1.50	Warning	235
<b>2</b>	<b>What are boundary elements?</b>	<b>239</b>
2.1	Influence functions or Betti's theorem	240
2.2	Structural analysis with boundary elements	247
2.3	Comparison finite elements—boundary elements	262
<b>3</b>	<b>Frames</b>	<b>269</b>
3.1	Introduction	269
3.2	The FE approach	270
3.3	Finite elements and the slope deflection method	289
3.4	Stiffness matrices	292
3.5	Approximations for stiffness matrices	298
3.6	Cables	305
3.7	Hierarchical elements	309
3.8	Sensitivity analysis	313
<b>4</b>	<b>Plane problems</b>	<b>327</b>
4.1	Simple example	327
4.2	Strains and stresses	334
4.3	Shape functions	337
4.4	Plane elements	338
4.5	The patch test	344
4.6	Volume forces	346
4.7	Supports	347
4.8	Nodal stresses and element stresses	358
4.9	Truss and frame models	362
4.10	Two-bay wall	364
4.11	Multistory shear wall	366
4.12	Shear wall with suspended load	373

4.13	Shear wall and horizontal load	375
4.14	Equilibrium of resultant forces	378
4.15	Adaptive mesh refinement	382
4.16	Plane problems in soil mechanics	386
4.17	Incompressible material	392
4.18	Mixed methods	394
4.19	Influence functions for mixed formulations	398
4.20	Error analysis	400
4.21	Nonlinear problems	401
<b>5</b>	<b>Slabs</b>	<b>415</b>
5.1	Kirchhoff plates	416
5.2	The displacement model	421
5.3	Elements	422
5.4	Hybrid elements	425
5.5	Singularities of a Kirchhoff plate	429
5.6	Reissner–Mindlin plates	431
5.7	Singularities of a Reissner–Mindlin plate	436
5.8	Reissner–Mindlin elements	439
5.9	Supports	441
5.10	Columns	443
5.11	Shear forces	451
5.12	Variable thickness	452
5.13	Beam models	459
5.14	Wheel loads	460
5.15	Circular slabs	461
5.16	T beams	462
5.17	Foundation slabs	469
5.18	Direct design method	476
5.19	Point supports	477
5.20	Study	480
5.21	Sensitivity analysis	480
<b>6</b>	<b>Shells</b>	<b>485</b>
6.1	Shell equations	485
6.2	Shells of revolution	488
6.3	Volume elements and degenerate shell elements	490
6.4	Circular arches	491
6.5	Flat elements	493
6.6	Membranes	498

<b>7</b>	<b>Theoretical details</b> .....	503
7.1	Scalar product .....	503
7.2	Green's identities .....	508
7.3	Green's functions .....	516
7.4	Generalized Green's functions .....	519
7.5	Nonlinear problems .....	526
7.6	The derivation of influence functions .....	529
7.7	Weak form of influence functions .....	535
7.8	Influence functions for other quantities .....	539
7.9	Shifted Green's functions .....	541
7.10	The dual space .....	552
7.11	Some concepts of error analysis.....	560
7.12	Important equations and inequalities .....	567
	<b>References</b> .....	577
